eHS Release Notes (11 October 2010)
Smart Identity Card Interface

Summary:

From 11 October 2010 onwards, the eHealth System will be enhanced to support reading specified personal data in Smart ID Cards by the card readers.

Affected functions:

1. Claim
2. eHealth Account Rectification

1. Claim

- In the Search Account page of claim function, for the document type of 'Hong Kong Identity Card', a 'Read Card and Search' button is added for reading personal data from Smart ID Card.
- Click "Read Card and Search" button and ask the HKIC holder to insert the card into the card reader.
- Press the "Confirm" button in confirm page.
- Wait the status bar to finish reading card face data. When the status bar reaches 100%, the HKIC can be removed from the card reader.
- The search result will be displayed.
- If there is no eHealth account for the patient, you may create a temporary eHealth account for the patient. The system will display the specified personal data from the Smart ID Card and you have to select the patient's "Gender" in the System.
